## The moon is out of bounds repeatedly this month

July 10-14 (as far as 26° 54')

July 23-29 as far as 26° 54'

Mercury is out of bounds July 6 to July 13.

- Jun 28, Tues**      **New Cancer Moon** (07 Cn 53) at 7:54p  
**Neptune** Stations **Retrograde** (25 Pi 26)  
at 12:54a
- Jun 30, Thurs:**      **Moon** passes south of **Castor** (20 Cn 31)  
and **Pollux** (23 Cn 29)
- Jul 1, Fri:**      **Moon** is out of bounds 24N52  
**Mars** (27Ar 46) is square **Pluto** (27 Cp  
46) 7:13p  
**Venus** conj **Aldebaran** (10 Ge 05)  
**Moon** is NNE of the **Beehive Cluster** in  
the **Crab**.
- Jul 2, Sat:**      **Mercury** (25 Ge 26) is square R  
**Neptune** (26 Pi 25) 1:52p
- Jul 3, Sun:**      **Mercury** is at the 1st guardian of the  
threshold stage in its Apollo stage at (26  
Ge 31). **Mercury** leaves the morning sky  
**Moon** is near **Regulus** (00 Vi 06) in the  
evening sky

**Jul 4, Mon:**        **Mars** enters **Taurus** 11:03 p  
                         **Mercury** enters **Cancer** 11:25p

**Jul 5, Tues:**        **Sirius** (14 Cn 22) is aligning with the  
                         **Sun**

**Sirius** is thought to bring high frequency energy that helps raise consciousness and hastens the evolution of our planet. Sirius and the Sun will rise and set together at this time of year. Some consider Sirius the spiritual sun; as it is the brightest star in the sky. It is located in the the constellation of the Dog, hound of Orion the hunter who resides just to the right in the night sky. Sirius is related to the natal chart of the U.S. as it was aligned with the sun on July 4, 1776. Our forefathers wanted this energy to be present for our nation's birth.

**Jul 6, Wed:**        **Mercury** out of bounds until 7/13

**Venus** (12 Le 01) is opposing **Saturn**  
(12 Aq 01R)

**Jul 7, Thurs:**     **Moon** is NE of **Spica** (24 Le 06)
