Daily Alignments from Mary

All planets are still in direct until April 29 when Pluto stations retrograde at 28 Cp 35

Venus Mars Jupiter and Saturn are visible in the am sky
Mercury is not visible in am sky initially but will rise in the evening sky around **April 11th** to begin its **Hermes Phase**

Mars is still emerging into his **Aries** rebirth, both broadening awareness of its new Role. **Mars** expands further into its Aries Overtone while exposing old roots that need to dissolve. **Chiron** is conjunct the **Sun, Moon and Mercury** in **Aries** to open this astrological New Year, perhaps addressing the fragmentations of the soul in need of healing now to complete a strong Aries sense of self. **Jupiter** conjunct **Neptune** has been active in this as well. What lost pieces of your true self are you here to reclaim and where do you limit yourself from all you came to be? What emotional triggers create raw feelings that once felt can become your medicine for others?

Apr 16, Sat: **Full Libra Moon** (26 Li 46) 11:55a
The Pink Phlox Moon relates to wildflowers blooming in North America in the early spring. The Native American names for this Moon referred to spring thaws and the return of growth. This moon has also been called the Breaking Ice Moon and The Moon of the Red Grass.

European names for this Moon reference the budding and birth of spring: Anglo-Saxons called it Egg Moon, Celts saw it as the Budding Moon, New Shoots Moon, Seed Moon, and Growing Moon. A Neo-Pagan name is Awakening Moon.

The April Full Moon can also be the **Paschal Moon**, as it is used to calculate the date for Easter.
