

**FEBRUARY NEW MOON TO MARCH NEW MOON 2021
ALL TIMES GIVEN ARE PST**

By Mary Kern prepared for our February Members'

**Planetary movements
from New Moon Feb 11 to New Moon Mar 13, 2021**

The **Sun, Mercury, Venus, Jupiter and Saturn** are integrating the radical change agent energy of **Aquarius**. **Mars** moves from **Taurus** into **Gemini** telling us perhaps that *"Fun is better than Perfect"*! **Saturn squaring Uranus** makes us question the structure of reality we think we know. A radical version of how we create reality currently found in quantum physics reiterates what was understood long ago.

Materia Prima was known the *"First Thing"* and well known by the ancient Egyptian pharaoh, Akhenaten.

This is the "dark matter of the universe" — the unorganized potential for manifesting what we desire. In Shamanic Astrology we often reference this as "being in the womb" or in the "caldron of creation". Do you currently feel like everything is extremely fluid and unstable right now? We are in an in-between the manifest and unmanifest.

We are the ones who stands between the unmanifest and the manifest worlds.

We use our desires and consciousness to activate the potentialities or possibilities that turn our dreams into matter.

This is the all prevailing potentiality found in quantum physics as the energy in the atom.

We mold this energetic dark matter clay using our *intention* and *attention* to turn it into the material world!

The moon, unlike the Sun, is highest in the sky during the winter months—found highest in the sky when standing on the Equator.

In the night sky at this time you may find the Constellation **Pegasus** (4 Stars making a Dimond) west of our easily found red planet, **Mars**. To the east of **Mars**, along the plane of our galaxy, are many bright stars in close proximity including **Sirius (Canis Major)**, **Betelgeuse** and **Rigel** the shoulder and knee of **the Hunter**, **Procyon** in **Canis Minor**, **Aldebaran (The Bull's eye)**, and **Capella** in **Auriga**.

Sun	12 Aq 49
Ingress 2/18/21	Pisces until March 20 when it moves into Aries
Ends	22 58 Pi

Mercury	morning sky 2/20
Begins	16 Aq 47
Stations Direct 2/20	11 Aq 01 at 4:51pm
Ends	26 Aq 38

Venus	disappears from the sky 2/14
Begins	12 Aq 13
Ingress 2/1/21	Aquarius
Ingress 2/25	Pisces to Mar 21 when Venus moves into Aries
Ends	19 Pi 42

Mars	In the evening sky well in view up high in the south
Begins	18 Ta 10

**Ingress 3/3
Ends**

**Gemini ?????
05 Ge 22**

**Jupiter
Begins
Ends**

**morning sky 2/11
12 Aq 30
19 Aq 22 near the tail of the goat (20 Aq 27)**

**Saturn
Begins
Ends**

**morning sky
06 Aq 29
09 Aq 44**

**Uranus
Begins
Ends**

07 Ta 04
08 Ta 06

**Neptune
Begins
Ends**

19 Pi 37
20 Pi 43

**Pluto
Begins
Ends**

25 Cp 32
26 Cp 19 near **star Terebellum** in the
hindquarter of the horse when the Archer was
depicted as a centaur (26 Cp 07)

**Chiron
Begins
Ends**

06 Ar 21
07 Ar 56

**Ceres
Begins
Ends**

26 Pi16
07 Ar 48

**Vesta
Begins
Ends**

19 Vi 20 R
12 Vi 09 R

Feb 11, Thurs: **Aquarius New Moon** (23 Aq 17) at 11:06 in the left shoulder of the water bearer within a degree of the star **Sudalsuud** (23 Aq 29)

Sudalsuud, the brightest star in the Water Bearer, in many cultural myths relates to the rising sun when the winter has past—seen as good fortune aligned with the essence of spring.

In Chinese mythology, **Sudalsuud** represents the feminine archetype, the yin, the Great Mother, the void from which creation birthed—translated “the first star of emptiness. (Wikipedia)

Venus (12 Aq 34) conj **Jupiter** (12 Aq 34) 6:59a

Feb 12, Fri. **Venus** conj **Mercury R** (14 Aq 42) 11:48p
Mercury is in its metamorphic phase integrating its **Libra overtone** as it prepares to move into the **Aquarius overtone** of its new synodic cycle.

Feb 13, Sat. **Moon** conj **Nept** (19Pi 42) 12:10p
Venus, 10 degrees from the Sun, enters the underworld until May 3rd, is no longer visible.

Feb 14, Sun. **Valentine's Day**
Mercury R conj **Jupiter** (13 Aq 20R) near the heart in the goat constellation
Moon conj **Chiron** (06 Ar 32) 8:35 p

Feb 15, Mon. **Retrograde Mercury** appears in the morning sky in the constellation of the Goat

Feb 17, Wed. **Moon** conj **Uranus** 9:48a (07 Tau 43D) squaring with **Saturn** 1 minute prior 9:47a **Saturn (07 Aq13) square Uranus** (07 Ta13 D), 11:08a, 07 Ta is close to the **Star Hamal** in the forehead of the Ram Constellation which aligned with the spring equinox at the start of the Patriarchal era.

- **How is Star Hamal informing Aquarius?**
- **What has been learned from the dominating control program that has held our planet in imbalance?**
- **How will Uranus bring in novel, revolutionary change to take us beyond the patriarchy?**

Major 2021 Alignment with **Saturn** and **Jupiter** in **Aquarius**: first of 3 **Saturn** sq **Uranus** in 2021.

Jun 14 (13/06 Aq and Tau)

Dec 24 (11/05 Aq/Tu)

Mercury and **Jupiter** will square the **Moon** this evening

Feb 18, Thurs. **Moon** at **Apogee** (15 Ta 23) a waxing crescent within 3.5 degrees of **Mars**
Apogee is the point of greatest separation between Earth and the Moon
Sun enters Pisces 2:43 a
Third Moon Mars Conj (22 Ta 29) 4:47 pm (22 Ta 29)

Feb 19, Fri. **Venus** at **Aphelion** 9p with the 1a quarter moon
Aphelion is when Venus is at its furthest from the Sun
Venus (23 Aq 00) sq **Mars** (23 Ta 00) 3:03 p

- Feb 20, Sat.** **Mercury** (11 Aq 01) **Stations Direct** 4:51pm
is experiencing an archetypal metamorphic shift
from **Libra** to **Aquarius** and begin its new cycle
as it returns to the morning sky.
This marks a second event of all planets moving
direct for **66 days** until Pluto station retrograde
on April 27.
- Feb 25, Thurs.** **Venus enters Pisces** 5:11 a
Jupiter, Saturn, and Mercury
together within 4 degrees from one another
from 08 Aq to 16 Aq, 30 minute before sunrise
- Feb 27, Sat.** **Full Snow Moon** (08 Vi 57), 12:17a
- Mar 1, Mon.** **Moon at perigee** 9:19p
Perigee is the point of closest approach of the
Moon to Earth making its rise appear extra
large.
- Mar 3, Tue.** **Mars (29 Ta 54) with the Pleiades** ()3:36p
Mars enters Gemini 7:29pm
- Mars 4, Wed.** **Mercury conj Jupiter** 09 Aq 32 D
Sun opposite Vesta in Virgo
- Mar 6, Fri.** **Mercury (18 Aq) at Greatest Elongation** -27.3
W at 12:03 am -
- Mar 8, Mon.** **Moon** (12 Cp 39) conj **Nunki** 10:52a
the star in the vane of the arrow in the
Archer's hand

Moon conj Pluto (26 Cp 13) 4:52p

Mar 9-10 Tue/Wed. **Saturn** (09 Aq 24) with **Jupiter** are near the **Moon** (09 Aq 28)

Mar 10, Wed. **Neptune conj Sun** (20 Pi 37) 3:39p
Moon Conj Jupiter (18 Aq 47) 9:57a

Mar 12, Thurs. **Venus conj Moon** (19 Pi 28) in the Underworld
7:30p

Mar 13 **Pisces New Moon** (23 Pi 04) 2:21am
near star **Markab**, in the left wing of the
Pegasus Constellation (23 Pi 45)
Mercury at Aphelion, its furthest point in its
orbit from the Sun 12:18a

Daylight Savings Time begins on March 14 at
2 am pst—remember to “spring forward” your
clocks!
