Ash Wednesday, the first day of the 46 days of lent for the christian calendar. Yes, Lent represents the 40 days Jesus spent in the dessert—so why 46 days of lent? These are days of fasting and repentance and Sundays

Christians are not allowed to fast on Sundays so the period is stretched out to 46 days.

Mar 3, Thur: **Mars** conj **Pluto** (27 Cp 50) 12:43a
 Venus conj **Pluto** (27Cp 50) 9:56a

Mars and **Venus** conjunct **Pluto** involves the shadow of the masculine and feminine as they leave the old Capricorn and begin their journey together through Aquarius—releasing the shadow as Pluto composts what no longer works for humankind perhaps activating a higher form of Capricorn.

Vesta is close by to honor the sacred inner self as both the masculine and feminine integrate their sacred marriage of these new evolving Capricorn energies. Vesta is within less than 2 degrees helping sanctify life and make it once again sacred with her purifying fires.

Sun in Pisces opposes the **Moon in

This last full moon of winter the Native
Americans called the **worm moon**. This is
when the worm trails appeared in newly
thawed ground. Other names for the full
Virgo moon have been sited as the chaste
moon, death moon, crust moon and sap
moon, for the tapping of the maple trees.

Spring Equinox celebrates the first day of spring. The first Sunday after the full moon following the equinox is when Easter falls. The earliest it lands is March 22 and the latest is April 23-25. Twice a year, at March Equinox and again at September Equinox, we are gifted a sacred portal. During this current 72 year window, from 1968 to 2032, a bonus gift magnifies the potential for magic. During these years of Galactic Alignment light codes assist the evolution of all of creation.

What a great opportunity to create your vision board to confirm the *New World* you personally dream of creating. Imagination is the first step of co-creation.
