

SAMS Monthly Membership Call

March 1, 2022

with Erik Roth and Mary Kern

Highlights of this March lunation include:

- New Moon in Pisces
- Early Morning Sky Alignment in Capricorn/Aquarius
- Mars-Venus Conjunction
- Mars and Pluto Conjunction
- Venus and Pluto Conjunction
- Mars and Venus enter Aquarius together
- Jupiter-Sun Conjunction
- Virgo Full Moon
- Jupiter Rises in the Morning Sky
- March Equinox
- Uranus squares of Venus and Mars

New Moon

March 2nd

12°06' Pisces

With the Sun in Pisces, the New Moon is always the same sign as the Sun. This Pisces New Moon is in the Water-Bearer Constellation. This symbolizes a revitalized intent of empathy, compassion and being of service in the world. It's time to stop fighting and make violence a thing of the past.

The Sabian Symbol, 13 Pisces is **"A sword, used in many battles, is now in a museum"**. The keywords are, *"Willpower. Martial Arts. Putting aside thoughts of vengeance and revenge. Hanging up or laying down one's sword. Trophies of conquest that remind us of the past. History. Aging and maturing. Retirement. Remnants of battles. Souvenirs of the past. Words as swords. The Spear of Destiny. Famous swords. The search for truth and justice. Suits of armor. Peace at last."*

***Mars and Venus within 1° between Feb 11
– March 12***

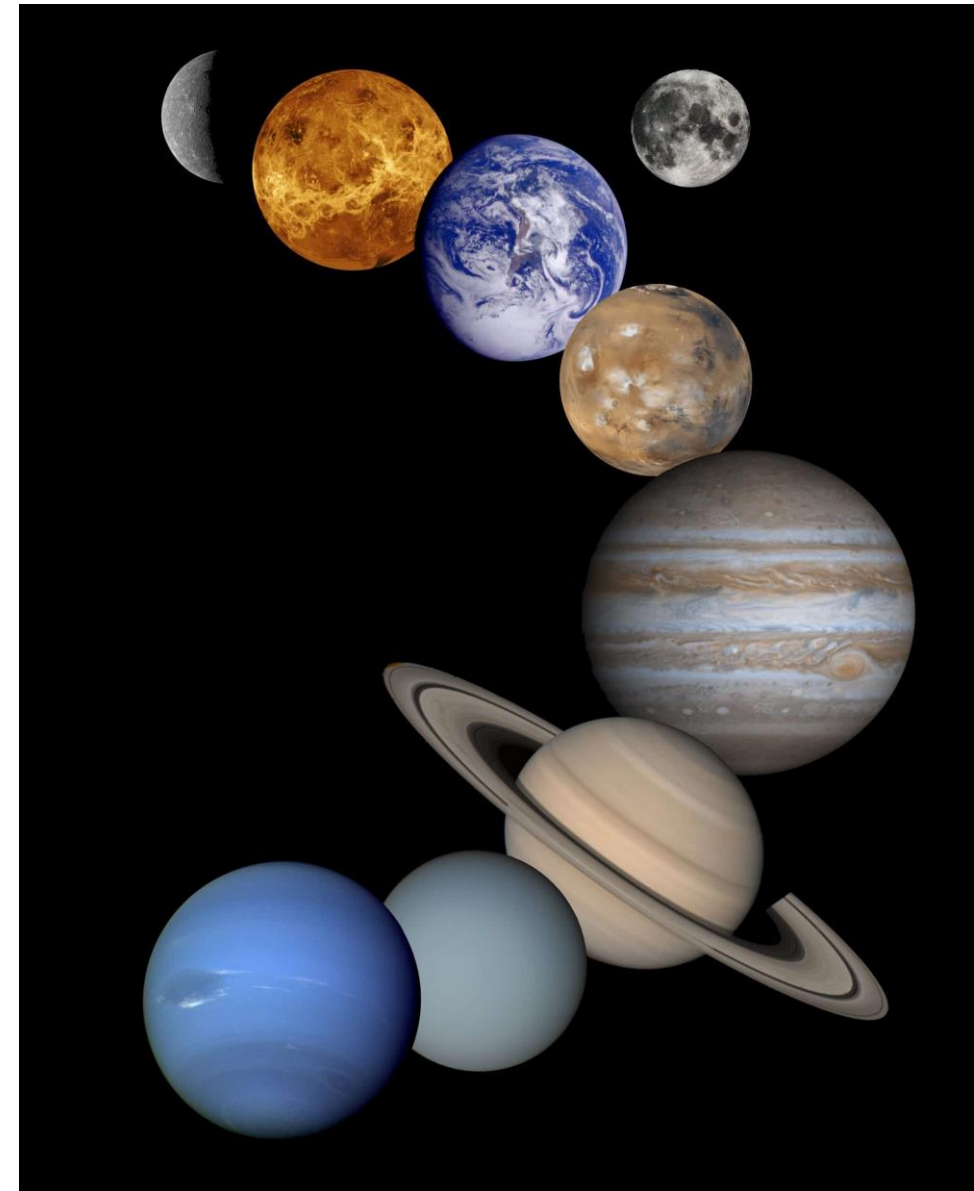

March 2 – Moon conjunct Jupiter at 14°19' Pisces /
Mercury conjunct Saturn at 18°59' Aquarius

March 3 – Moon conjunct Neptune at 22°29' Pisces /
Mars and Venus conjunct Pluto at 27°50' Capricorn

March 4 – Moon conjunct Chiron 10°44' Aries

March 5/6 – Sun conjunct Jupiter 14°58' Pisces /
Mars-Venus conjunction 00°00' to 00°07' Aquarius

Mars enters sign of Aquarius 7 minutes before Venus

March 5, 2022

The Alignment in Capricorn

Capricorn is the overriding experience with this stellium of planets until March 5/6 and its all in how the planets “channel” it, energetically, with us. We can ask ourselves:

- What is truly important?
- We can inquire about what it takes to sustain a comfortable life but not a life to excess.
- Where do our responsibilities fall upon?
- Are we taking responsibility for what we are aligned with in our soul's journey?
- How will it benefit the livability of future generations (not just to live but to thrive)?

Evolution into Aquarius

As Mars and Venus ingress into the sign of Aquarius late on March 5th, there can be an experience of emerging freedom or at least a greater desire for it. Innovation and “out-of-the-box” thinking is encouraged to navigate for several weeks after Mars and Venus enter Aquarius. Some major points include:

- What is your definition of freedom of thought?
- How can we adapt to the rapid shifting and prepare ourselves mentally for radical changes?
- This is an invitation to be novel in our lives, meaning try new things that support new healthy experiences
- What can we do to act in our local community to also support humanity on a global level?

March 13 – Clocks Forward 1 Hour

On this day (now the 2nd Sunday in March) at 2am, the USA moves the hour-hand of clocks forward 1 hour. All states except Arizona, Hawaii and many overseas US territories do not practice what is called “**Daylight Savings Time**”.

Germany was the first nation to do this practice in 1916 with the US following in 1918. Congress abolished it after WW1 and then it came into use again in 1942. Some localities and states used it between the World Wars and after WW2.

The US did not fully nationalize DST until **1966 with the “Uniform Time Act”**, but each state was allowed to decide if they wanted to have DST or not.

Clocks are moved back 1 hour on the first Sunday of November in the US.

Many other countries around the world practice this, but it is far from uniform as more than half the world does not observe it. There are proposals in several US states to keep DST around all year.

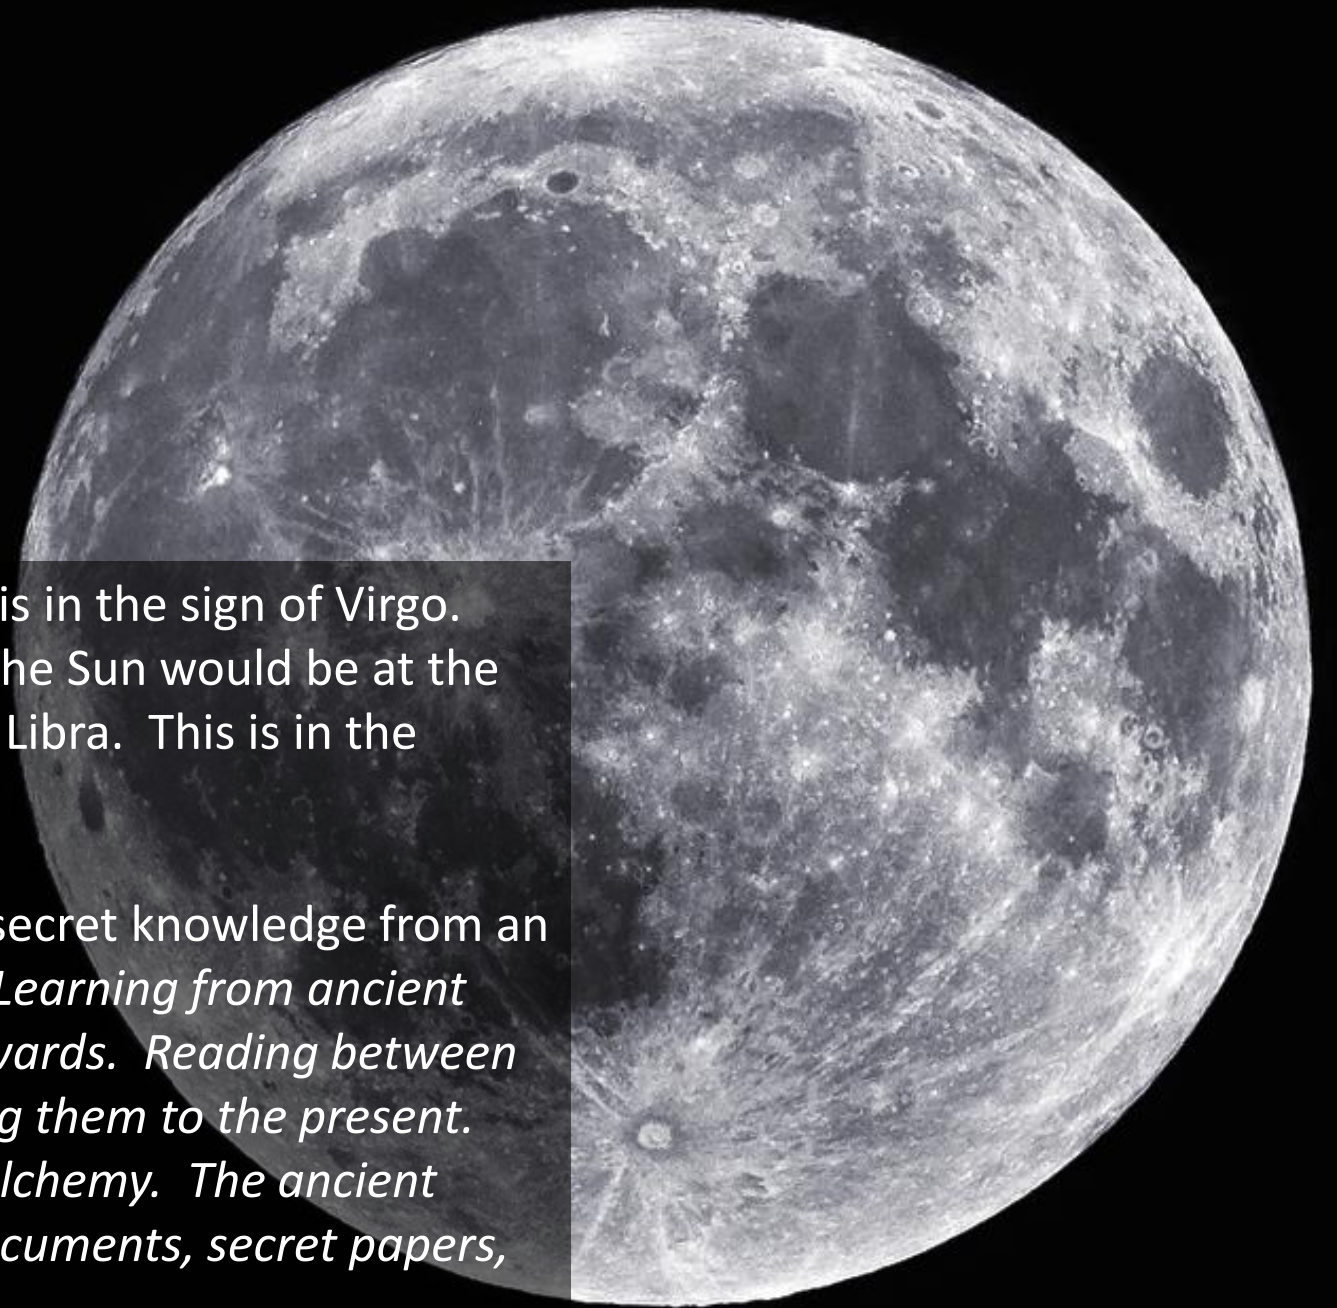

Full Moon

March 18th

27°40' Virgo

With the Sun in Pisces, the Full Moon this month is in the sign of Virgo. This Virgo Full Moon is nearly at the point where the Sun would be at the Sept Equinox (typically Sept 22/23), which is Zero Libra. This is in the Priestess Constellation

The Sabian Symbol, **28 Virgo** is “A man is gaining secret knowledge from an ancient scroll he is reading”. The keywords are, *“Learning from ancient mysteries. Looking for answers. Study and its rewards. Reading between the lines. Finding clues from the past and applying them to the present. Being privileged to look into something special. Alchemy. The ancient books and writings. Akashic records, classified documents, secret papers, and scribes.”*

The March Equinox

- The Equinox is a day when there is relatively the same amount of sunlight as there is a lack of sunlight or darkness
- Astrologically, it marks the Sun ingressing into the sign of Aries
- An Equinox is the halfway point between a *minimum* of solar light at Winter Solstice and a *maximum* of solar light at Summer Solstice
- At the March Equinox, the Sun migrates north of the equator, ushering in Spring for the Northern Hemisphere and Autumn for the Southern Hemisphere

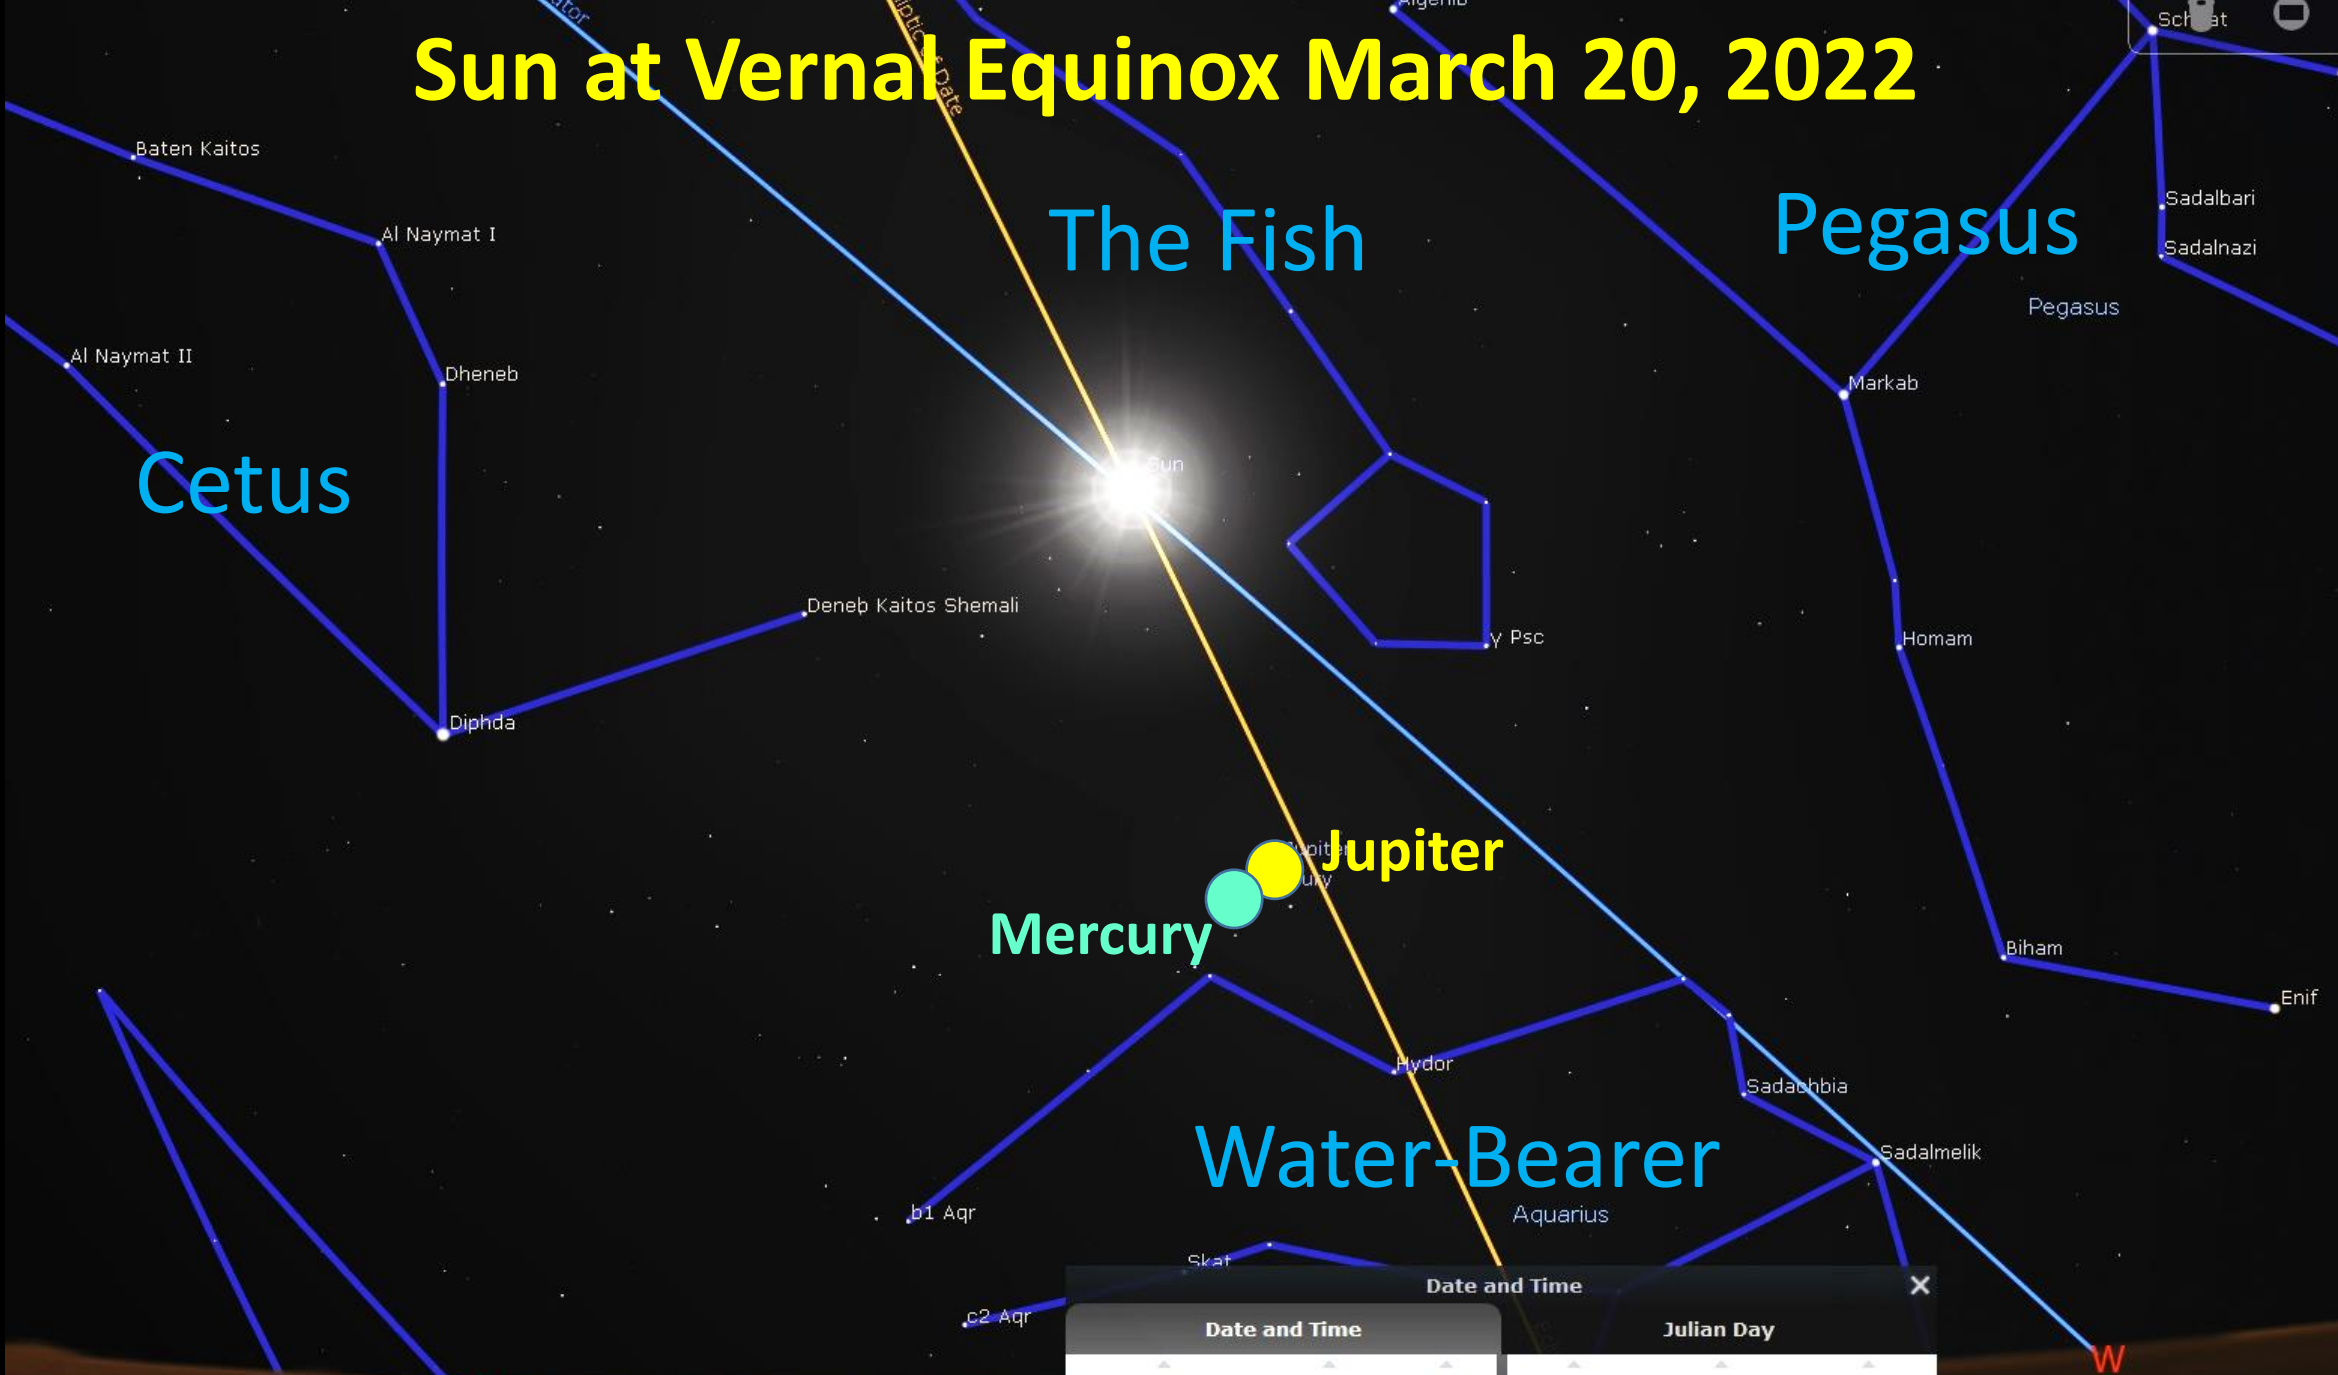

Earth's Seasons in relation to its orbit of the Sun

Using the Vernal Equinox Point

- **One part of or the start of a calendar – marking time and the cycles of everything**
- **Honoring the planet in which we are born, live and die and born once again**
- **Deepening our connection to the Cosmos and how it relates to the Earth Mother**
- **Inspiring/Receiving the Transmissions for the Creation of Living Libraries, Monuments, Temples and Cosmic Clocks and other structures**
