**BOLD/ITALICS indicate a Vesta Synodic Cycle "precess" into a new sign**

**Example at Finding your Vesta Overtone:** Erik was born on 11/25/71. His birthdate falls between the "Acronychal Rise" dates of Vesta on July 22, 1971 and November 30, 1972. Erik would use the Acronychal Rise date that is closest, but preceding his birthday.

Therefore, Erik has a **♁ Overtone**.
